PROFILE

Java Backend Developer with 2 + years of hands-on experience in building and maintaining scalable server-side API applications for production environments. Experienced in implementing business logic, optimizing performance, and collaborating effectively within development teams.

PROFESSIONAL EXPERIENCE

Java Backend Developer
TechOxelio Technologies Pvt. Ltd.
11/2024 – 10/2026 | Kolkata

- Designed and developed scalable RESTful APIs using Spring Boot for a logistics-based eCommerce platform handling quotes, orders, and invoice workflows, while implementing end-to-end invoice generation, tax logic, and scheduled background jobs to ensure accurate billing, regulatory compliance, and seamless financial operations, performed API testing to maintain system reliability and code quality.
- Wrote optimized MyBatis and JPA queries for complex data retrieval and transaction management in MySQL, improving system performance and reliability.
- Worked closely with frontend and cross-functional teams to deliver scalable features and resolve production issues, actively participating in code reviews, debugging, and performance optimization to ensure high-quality, production-ready architecture.
- Integrated QuickBooks with the backend system to automate invoice, bill, payroll, and tax entries while incorporating dynamic exchange rate handling for multi-currency transactions, and developed Java-based automation to create and manage employees, vendors, and customers directly from the application, significantly reducing manual accounting efforts and improving financial data accuracy and consistency.

SKILLS

Backend Technologies: Core Java, Spring Boot, RESTful APIs

Database: MySQL

ORM & Persistence: JPA, MyBatis

Development & AI Tools: Intellij, Git, Maven, Postman, Cursor, Claude

LANGUAGES

Bengali | English | Hindi

PROJECTS

Logistic E-Commerce Service
SHIPCARTE
11/2024 – 09/2026

Built and maintained the backend of a logistics service platform handling end-to-end order processing, invoicing, tax computation, and payment workflows. Integrated QuickBooks for automated invoice, payroll, and multi-currency financial management.

Inventory Management System — Independent Collaborative Project

Role: Backend Developer
Technologies: Java, Spring Boot, MySQL, Git

Developed and maintained the backend of a web-based Inventory Management System using Java, Spring Boot, MySQL, JPA/Hibernate, and MyBatis. Implemented JWT-based authentication and authorization, purchase, sales, stock search and transfer, user and employee management, item management, and Excel-based report exports. Developed REST APIs, business logic, database operations, validation, exception handling, and collaborated with the frontend developer for seamless API integration and deployment.

COURSES

Java full stack development
JSpider Kolkata

Completed comprehensive training in Core Java, Spring, SQL from JSpider, Kolkata**.**

EDUCATION

Techno Engineering College banipur
Bachelor of Technology
2019 – 2023

CGPA : 8.78

Chandrakona Road Saradamoyee High School
Higher Secondary
2018

Percentage : 68%

Chandrakona Road Saradamoyee High School
Secondary
2016

Percentage - 82.43%
